

## TRI-P TERRA

DESIGN DIESEL /2009

Tri-p is a nomadic, quick-change object, an idea of contemporary mobility that characterises the most varied spaces, in every moment and anywhere in the world. It opens and is dressed with a soft diffuser in elastic fabric on a rigid metal support, it closes and can be carried anywhere, in its special case: into another room or into another home. Tri-p has a warm, diffused light, perfect for relaxation or reading. Its transportable nature and versatility have been designed for those who are always in movement, but want to take a friendly object with them, one that is attractive and personal. The touch of 'dressing' the metallic support with a fabric diffuser is an irresistible reference to the world of fashion and shopping.
